

Apprentice Community Connectors

...“I originally started at the Citizens Advice Bureau in August 2012 on paid work experience. I have since been enrolled on the Apprenticeship programme and am now working on the Community Builders Project.

I have helped with many ideas, but I especially enjoyed the Winter Warmers as I originally came up with the idea. Seeing my idea getting put into action and helping so many people as it did, makes me feel over the moon. It has given me more confidence to come up with more ideas that are going to help the people in my community”...
